/note="Vector: pCR 4-TOPD. This is an early neurogenesis SSH library created by Mathew L. Rise constructed by subtracting late neurogenesis (mixed stages: hindbrain swelling + heart tube with peristalsis) from early neurogenesis (mixed stages: neural groove + 1/2 epiboly). Fish were from a domesticated strain (Spring Valley Trout Farm, Langley, B.C.), courteey of Bob Devlin, DFO. These are mostly internal (coding) sequences."

/note="Organ: brain, Vector: pCR2.1-TOPO (Invitrogen);
Site_1: ECORI; Total RNA (purified with Trizol and DNAsed before use) was reverse transcribed using a modified oligo-dT primer containing Rsal and HindIII sites.
Double- stranded cDNA was digested with Rsal, resulting in blunt ended cDNA of an average 0.1-2 kb in length.
Digested cDNA was split into two sets, one used as is set the driver, the other set was split in half again and each half linked to a different adaptor
(5'-TCGAGCGCGCCGCGCGCGT-3'), to be used as tester.
Subtraction was performed using the Clontech PCR Select cDNA aubtraction kit. Pool of two schizophrenics, male age two mentally normal male individuals ages 41 and 53 (S-116, S-118) subtracted by pool of two mentally normal male individuals ages 41 and 53 (S-124, S-141). Tissues were obtained from the Stanley constructed and subtracted by Dr. Nancy Johnston [(410) 614-3918, nlj@welchlink.welch.jhu.edu]."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                CA734840 344 bp mRNA linear EST 26-NOV-2002 wpils.pk002.ell wpils Triticum aestivum cDNA clone wpils.pk002.ell 5' end, mRNA secuence.

Subtraction was performed using the Clontech PCR Select CDNA subtraction kit. Pool of two schizophrenics, male age 44 and female age 56 (S-116, S-118) subtracted by pool of two mentally normal male individuals ages 41 and 53 (S-124, S-141). Tissues were obtained from the Stanley Neuropathology Consortium (www.stanleylab.org). Library

APPLICANT: Zhang, Jimmy
APPLICANT: Astel, John
APPLICANT: Astel, John
APPLICANT: Bridge, Wilson O.
APPLICANT: Endege, Wilson O.
APPLICANT: Ford, Donna M.
APPLICANT: Ford, Donna M.
APPLICANT: Schlegel, Robert
APPLICANT: Schlegel, Robert
APPLICANT: Steinmann, Kathleen E.
TITLE OF INVENTION: GENES AND GENE EXPRESSION PRODUCTS THAT
TITLE OF INVENTION: ARE DIFFERENTIALLY REGULATED IN PROSTATE CANCER
FILE REFERENCE: 1532.002/200130.463
CURRENT PILLING DATE: 1999-06-09
NUMBER OF SEQ ID NOS: 341

Sequence 268, Application US/09280116A
Patent No. 6331427
GENERAL INFORMATION:
APPLICANT: Robison, Keith B.
TITLE OF INVENTION: Nucleic Acid Molecules Encoding Human Protease Homologs
PILE REPERENCE: 5800-24, 035800/176965
CURRENT APPLICATION NUMBER: US/09/280,116A
CURRENT FILING DATE: 1999-03-26
NUMBER OF SEQ ID NOS: 268
SOFTWARE: PatentIn Ver. 2.0
SSOFTWARE: PatentIn Ver. 2.0
IENGTH: 791
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 APPLICANT: Endege, Wilson O.

Sequence 102, Application US/09328475C

Patent No. 6476207

GENERAL INFORMATION:

APPLICANT: Abrel, Jon H.

APPLICANT: Carroll III, Eddie

APPLICANT: Bendege, Wilson O.

APPLICANT: Bendege, Wilson O.

APPLICANT: Schiegel, Robert

APPLICANT: Schiegel, Robert

APPLICANT: Schiegel, Robert

APPLICANT: Schiegel, Robert

TITLE OF INVENTION: GENE EXPRESSION PRODUCTS THAT

TITLE OF INVENTION: GENE AND GENE EXPRESSION PRODUCTS THAT

TITLE OF INVENTION: ARE DIFFERENTIALLY REGULATED IN PROSTATE CANCER

FILE REPERENCE: 1532.002/200130.463

CURRENT APPLICATION NUMBER: US/09/328,475C

CURRENT FILING DATE: 1999-06-09

NUMBER OF SEQ ID NOS: 341

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            RESULT 54

US-09-328-475C-280/C

i Sequence 260. Application US/09328475C

j Patent No. 6476207

i GENERAL INFORMATION:

i APPLICANT: Zahag, Jimmy

i APPLICANT: Carroll III, Eddie

APPLICANT: Endege, Wilson O.

APPLICANT: Ford, Donna M.

APPLICANT: Prod, Donna M.

APPLICANT: Schlegel, Robert

APPLICANT: Schlegel, Robert

APPLICANT: Schlegel, Robert

TITLE OF INVENTION: ARE DIFFERENTIALLY REGULATED IN PROSTATE CANCER

TITLE OF INVENTION: ARE DIFFERENTIALLY REGULATED IN PROSTATE

CURRENT APPLICATION WHERE: 1999-06-09

NUMBER OF SEQ ID NOS: 341

SEQ ID NO 280

SEQ ID NO 280

LENGTH. 751

TUBENTH: 751

Sequence 86, Application US/09328475C

Sequence 86, Application US/09328475C

Patent No. 6476207

GENERAL INFORMATION:

APPLICANT: Astel, Jon H.

APPLICANT: Endeg, Wilson O.

APPLICANT: Findeg, Wilson O.

APPLICANT: Schlegel, Nobert

APPLICANT: Schlegel, Nobert

TILLE OF INVENTION: GENES AND GENE EXPRESSION PRODUCTS THAT

TITLE OF INVENTION: GENES AND GENE EXPRESSION PRODUCTS THAT

TITLE OF INVENTION: ARE DIFFERENTIALLY REGULATED IN PROSTATE CANCER

TILLE REFERENCE: 1532.002/200130.463

CURRENT APPLICATION UNMBER: 1950-06-09

NUMBER OF SEQ ID NOS: 341

SOFTWARE: FastSEQ for Windows Version 3.0

SEQ ID NO 86

LENGTH: 1024
                                                                                                                                                                                                                                                                                                                                                         GENERAL INFORMATION:
